

Power when you need it Specifications

One very big advantage of small machines is they can easily be moved from site to site (job to job) (contract to contract) and to facilitate this we have allowed the operator handle to fold flat for transit purposes and yet have the full range of operator adjustment when in use.

The style and proportion of the polyform water tanks allow for the machine to adopt a convenient tilt position with only approximately 5-litres in the clean water tank to facilitate single handed brush or pad changing.

Tilt mode

Folds down very small for easy storage or transit

Brush Motor	Vac Motor	Power	Fluid flow tap at 45°	Pad/Brush pressure	Cleaning Range	Pad/Brush width	Capacity	Weight	Brush Speed	Dimensions WxLxH

TwinTec...

The TwinTec 1840 cable machine has been designed to address the question of size being exceptionally compact, yet with performance equal to bigger machines.

TT1840

The compact and soft body design really does allow this machine to clean in areas normally cleaned by hand, yet 30% to 40% faster and better.

Although designed for small and congested areas the TT1840 is equally at home in larger areas and can be used in conjunction with our cable roll, "the cable reel that rolls", extending the cable length from 20m to 40m without any loss of performance.

A pleasure to use, convenient in size, generous performance, cleaning as it should be.

When small is truly beautiful

Like its battery brother, this is a machine designed from the floor up but still using a series of well and truly time tested components to ensure that performance and reliability go hand in hand.

A range of easy fit brushes and drive boards; all incorporating our 360° water feed system providing uniform liquid delivery to the floor, ensuring consistent performance standards.

Easy and generous fill cap

Simple controls

Visible operation

Easy brush access

Brushes or pads

Rugged all-steel chassis with full and easy access to all components

Robust and generous 18-litre polyform clean water container

Fully adjustable handle

High performance vacuum motor

Heavy Duty brush drive

270° Rotating Squeegee System

Easy filling

Easy clean polyform top dirty water container with simple dump hose emptying feature

The Cable Roll is one of those innovations we have been making for more than 30 years and they are more popular now than ever, providing an extra 20m of cable when you need it
