More effective cleaning results

TASKI scrubber driers remove up to 5 x times more soilage than mopping. A combination of increased cleaning pressure and superior water recovery means floors are visibly cleaner.

Superior cleaning pressure

Up to 10 x times cleaning pressure means mechanical cleaning is far superior to manual cleaning. Powerful and efficient digital motors ensure the swingo 250µmicro quickly removes stubborn soilage in one pass. Twister pads can improve results further and even restore neglected floors.

Superior water pickup

Even the best wet mopping systems leave an unsafe level of water residue. Wet floors mean high risk of slip fall. A powerful digital vacuum motor ensures up to 65% more soiled water is recovered leaving floors safely clean and dry.

Reduction in cleaning costs

One pass cleaning means no repeat cleans and no need to wait for floors to dry. With labour over 80% of total cleaning costs, the swingo 250µmicro saving can reduce total cleaning costs by up to 70%.

Water and chemical reduction

The swingo 250µmicro's super efficient water distribution means that 6,500L of water and associated chemicals are saved every year. That's a 80% reduction compared to mopping. The swingo 250µmicro isn't just a more efficient answer, it's also a more sustainable solution.

Safer and more ergonomic

The foot operated brush and squeegee levers means no bending over and the parking mode means the machine can be safely positioned if unattended. With its safe parking position, low handle weight and convenient transport mode the swingo 250µmicro is so simple to use. Clean faster and smarter, not harder.
