

# V18

## Liquid iodophor based disinfectant

A specially formulated iodophor, stabilised for use with all types of livestock and domestic pets.

Fast acting, stable germicide.

Cleans and disinfects in one operation.

- Colour coded to indicate activity.

### PREPARATION FOR DISINFECTION - ANIMAL HOUSING AND VEHICLES:

Remove all animals. Remove all portable equipment, litter and manure. Clean thoroughly with a suitable detergent, washing away to drain. Rinse surfaces thoroughly with water and allow to dry if possible. Ensure application equipment is clean before disinfection. Decant or dispense (using dispensing equipment) the concentrated product and dilute with water at 1:100. Application rate: 300 ml/m<sup>2</sup> disinfectant solution.

### ANIMAL HOUSING - SURFACE AND EQUIPMENT:

Prepare surfaces as above. Spray or foam the disinfectant solution making sure surfaces are thoroughly wetted and leave to dry for 30 minutes, porous surfaces should be allowed to dry for a minimum of 4 hours.

### ANIMAL HOUSING - EQUIPMENT IMMERSION:

Fill a clean container with the disinfectant solution and place equipment (e.g. buckets, cages, hatchery trays, drinkers, crates) in the solution, leave for 30 minutes before removing and allowing equipment to drain and dry.

### VEHICLE DISINFECTION:

Prepare the vehicle as above. First apply the disinfectant solution to the outside of the vehicle starting at the top and working down, including wheel arches, tyres, mudguards and underside of the vehicle. Thereafter, spray on the inside of the vehicle, starting at the top and working down, ensuring that all surfaces including the floor are covered. Minimum contact time 30 minutes before rinsing.

### DISINFECTION OF FISH FARM EQUIPMENT:

Equipment should be cleaned as above before disinfection. Prepare the product as above. Fill a clean container with the disinfectant solution and place equipment (e.g. buckets, trays, fish nets, crates) in the solution, leave for at least 30 minutes before removing, drain, rinse the equipment with clean potable water and allow to dry. For larger pieces of equipment such as fish holding tanks, fill cleaned containers with disinfection solution, leave for a minimum of 30 minutes, drain, rinse with clean water and allow to dry.

### WHEEL AND BOOT DISINFECTION:

Wheels and boots should be cleaned with a brush/power wash to remove organic material. Prepare the product as above. A two-minute contact time is required before moving from one area to another. Empty, clean and refill wheel baths when heavily soiled or after 72 hours, up to a maximum volume of 400 L. Footbaths must be covered / kept indoors in order to prevent dilution by rain.

### AFTER DISINFECTION:

After disinfection, empty and clean application equipment by rinsing with water. Used solutions can be flushed to the municipal sewer or disposed to the manure deposit depending on local requirements. Avoid release to an on-site waste-water treatment plant.

**Order Code: R073CEV**

Pack: 10 x 1 litre (12.59 kg)

Pallet: 42 Packs

### PRODUCT INFORMATION:

Appearance: Dark brown liquid  
Odour: Faint surfactant / iodine  
pH - undiluted: 0  
Shelf life: 3 years

COMPOSITION: Contains a blend of iodine, sulphuric & phosphoric acids and nonionic surfactant.

BIODEGRADABILITY: All surfactants used in Evans Vanodine products comply with the current European Regulations concerning biodegradability and protection of the environment.

Authorised biocide:  
UK-2019-1179-02

QUALITY ASSURANCE: This product is manufactured in the U.K. by EVANS VANODINE INTERNATIONAL PLC under an ISO 9001 Quality Management System Cert. No. FM 09535 and an ISO 14001 Environmental Management System Cert. No. EMS 506072 registered by the British Standards Institution.

REVISION DATE:  
28/06/21
