

Omniclean™

Fast Foaming Cleaner For All Areas

Omniclean™ foaming detergent is ideal for the first stage in the cleaning process of animal housing, transportation, hatcheries and food processing areas before terminal disinfection takes place and is the ideal product to be used in conjunction with Omnicide™. It can also be used to clean equipment and utensils in the animal health and food processing industries. Omniclean™ contains a non-ionic surfactant that will remove a wide variety of surface debris and soil such as protein and fats.

Omniclean™ is non staining at use dilutions and will not affect commonly used metals, vitreous glazes and plastics. It is stable under acid and alkaline conditions and is effective in hot and cold, soft or hard water. Although softened warm water is preferred.

Omniclean™ is easy and economical in use and disperses immediately in water. It does not form a scum. It is stable under normal conditions of storage. It can be used between work shifts or at other times, when working surfaces, conveyor belts, utensils, knives and equipment etc, are routinely cleaned. In common with all detergents, some care should be taken with continuous use, as in certain cases, some drying and reddening of the hands may occur and the use of protective gloves or creams is recommended.

- Heavy duty fast foaming cationic cleaner
- Ideal 1st stage cleaner
- Reduces wash water requirements
- Removes stubborn soiling
- Effective against biofilm
- Long contact time

Omniclean™ can be used in all animal and poultry houses, hatcheries, veterinary clinics and hospitals. Cattle and dairy farms, stables, transportation vehicles, green houses, all horticultural equipment and the food processing and brewing industries.

Omniclean™

Fast Foaming Cleaner For All Areas

For a heavy duty foaming clean dilute at between 1-2% depending on soiling and apply at low pressure through a foaming lance.

For general cleaning and low foam see table below for recommended dilutions

OMNICLEAN™ DILUTION RATE

FLOOR AREA SQUARE FOOT	FLOOR AREA SQUARE METRE	TOTAL SQUARE METRES	DILUTION RATE	CONCENTRATE SOILED AREA (100ml per m2)	TOTAL CONCENTRATE USED FOR SOILED AREA (Litres)
5000	465	1161	1-160	0.63 ml	0.73
10000	930	2325	1-160	0.63 ml	1.46
15000	1395	3487	1-160	0.63 ml	2.2
20000	1860	4650	1-160	0.63 ml	2.9
25000	2325	5811	1-160	0.63 ml	3.66
30000	2790	6972	1-160	0.63 ml	4.4

FLOOR AREA SQUARE FOOT	FLOOR AREA SQUARE METRE	TOTAL AREA SQUARE METRES	DILUTION RATE	CONCENTRATE PER CLEANER AREA (100ml per m2)	TOTAL CONCENTRATE USED FOR CLEAN AREA (Litres)
5000	465	1161	1-320	0.31 ml	0.36
10000	930	2325	1-320	0.31 ml	0.72
15000	1395	3487	1-320	0.31 ml	1.08
20000	1860	4650	1-320	0.31 ml	1.44
25000	2325	5811	1-320	0.31 ml	1.8
30000	2790	6972	1-320	0.31 ml	2.16

FOOD PROCESSING AND PREPARATION AREAS

Omniclean™ is the ideal cleaner for all food processing areas.

SLAUGHTER HOUSES

Cover all shackles, lines and equipment with Omniclean™ diluted at 1:160 using a foaming lance at low pressure or a knapsack sprayer. Leave for 20 mins and wash with potable water under pressure.

TABLES, TRAYS, TROLRIES, KNIVES AND EQUIPMENT: -

Spray or soak equipment with Diluted Omniclean™ at 1:320 or lower depending on soiling and fat residues. Leave for 15 minutes before washing off with potable water.

OMNICLEAN™ CAN BE USED AT DILUTIONS FROM 1:160 TO 1:320 DEPENDING ON THE LEVEL OF SOILING AND FATS TO BE REMOVED. FOAM WILL BE LESS THE HIGHER THE DILUTION.

ANIMAL HOUSING SETTERS AND HATCHERS - remove all equipment, litter, dung, dust and dirt. Apply Omniclean™ through a foaming lance or knapsack sprayer at low pressure at a dilution of 1:160 leave for 15 mins and clean with water under high pressure. For heavy duty foam clean apply at 1-2% depending on soiling. Especially in hatchers and sensitive areas.

CALF PENS AND REARING HOUSES: - Spray Omniclean™ under low pressure using a foaming lance or knapsack sprayer at a dilution of 1:160 and cover all surfaces and equipment. Leave for 15 mins and thoroughly wash and allow to dry before disinfectant is applied. For heavy duty foam clean apply at 1-2% depending on soiling.

POULTRY AND SWINE SLATS. Soak in a solution of Omniclean™ at 1:160 before passing through slat washer or manual wash

VETERINARY CLINICS AND HATCHERIES: Spray or scrub with Omniclean™ at a dilution of 1:160 or up to 1:320 dependant on the amount of surface debris present. Omniclean™ should be liberally applied and scrubbed onto all surfaces and parts to remove adherent matter. Apply at between 1-2% at low pressure in hatcheries and setters.

EGG LORRIES AND LIGHTLY SOILED VEHICLES: Spray Omniclean™ at low pressure at a dilution of 1:320. Thoroughly wash with water

GREEN HOUSES, POTS AND TRAYS: - Spray Omniclean™ at low pressure at a dilution of 1:200 wash with clean water. For heavily soiled pots and after infection soak in a solution of Omniclean™ diluted to 1:160

STABLES AND KENNELS: - Thoroughly clean after removing all bedding and spray Omniclean™ at low pressure diluted to 1:160 and cover all surfaces with foam. Leave for 15mins and wash thoroughly with water at high pressure. For heavy duty foam clean apply at 1-2% depending on soiling.
